

UNHINGED SOCIETAL FUCKERY HOUR

DEV-TEST Package · 2026-09-27 08:45 UTC

Dual hosts: Rex (N1) · Helios (N2) · fresh long-form script · ~20 min audio

1. Autonomous topic selection (operator: you choose)

Five load-bearing fuckeries of contemporary life—not a party jersey list, a mechanics list.

- 1. The Attention Casino** — Feeds are slot machines with better fonts—rage, envy, and FOMO as engagement fuel while sleep and focus get liquidated.
- 2. Housing as a Hostage Situation** — Shelter treated like a speculative asset class: rent extraction, zoning theater, and 'just move' advice from people who already own the ladder.
- 3. AI Theater vs Reality** — Hype cycles sell god-mode demos while reliability, copyright gray zones, and synthetic media erode the shared sense of what is true.
- 4. Trust Collapse in Public Health & Institutions** — Real failures + online grift = a public that can't tell a peer-reviewed correction from a thread with 40k likes and zero methods.
- 5. Privacy Theater & Surveillance Capitalism** — Cookie banners and 'we value your privacy' copy while behavioral data is the product—consent UX designed to exhaust, not protect.

2. Deliverables

- **PDF** (this executive document)
- **~20 minute MP3** multi-speaker Rex+Helios, enrich=true, unhinged prosody, NEW script (not recycled permanent-automation copy)
- **Stills** of Rex/Helios desk environment (Imagine photoreal quota exhausted this session → high-res stylized documentary stills shipped; retry photoreal when quota resets)
- **Video** slideshow kinetic cut from stills + full audio bed (Imagine video quota also exhausted → ffmpeg motion package)

3. Visual brief (for photoreal retry)

Rex: late-30s original fictional man, tired sharp eyes, short dark hair, stubble, black henley, 1:30am desk, monitor glow.

Helios: early-30s original fictional woman, freckles, curly hair, olive field jacket, mid-laugh, same desk chaos.

Environment: investigation desk, dual monitors, coffee, legal pads, blinds + city night, documentary photojournalism.

4. Thesis (through-line)

Modern extraction wears a convenience costume: attention markets tax time; housing markets tax surplus; AI theater taxes trust; institutional spin taxes certainty; privacy theater taxes dignity. Exit is literacy + boring habits, not a jersey.

5. Ops notes

Permanent AutomationCrew remains armed hourly. This DEV-TEST is a one-shot creative package, not a secret dump. No real-person likeness cloning.

Scene still (stylized fallback)
